A Frame Sign Systems

Sideline A Frame System:

Our lightweight and portable aluminum Sideline Systems can help your program or event generate valuable sponsor revenue. You've seen our Sideline Systems at sporting events advertising everything from cell phones to beverages. The Sideline System's versatility makes it an attractive option where portability and speed of setup is important. End zones and sidelines for football and soccer and track infields are just a few examples of the areas where the Sideline System is highly visible and effective.

Graphics are applied to our Tru-Satin Premium Banner, a special non-glare fabric printed with UV protected fade resistant inks. Graphics are firmly attached using velcro around the perimeter of the banner and can be easily changed for a new event. Each Sideline System is 34" h x 8' w and can be used as an 8' sign or can be linked together to form one large continuous barrier. It can be set up horizontally and hold two graphic panels or vertically and hold three graphic panels. It folds down to 8" x 8" x 8' size for easy storage and is UPS shippable.

8' Frame System \$290
 8' graphic (1 side) \$144

*Use two graphic panels for double sided applications

ModStar A Frame System:

The Modstar A Frame system works great for displaying sponsor banners or stadium graphics on any sport's courtside sideline or end zone. Modstar is "collision-safe" because it is made with player-friendly coroplast that gives and collapses when struck, then pops right back into place. It offers a cleaner and less wrinkled look than "saggy" padded systems and is less than 1/3 the cost.

Modstar graphics are applied to our Tru-Satin Premium Banner, a special non-glare fabric printed with UV protected fade resistant inks. Graphics are attached using velcro around the perimeter for quick and easy set up. This method of application holds tightly to the frame as well as allowing the graphics to be switched out while using the same frame. Modstar is a portable and modular A Frame system that can be linked together to form any size sign you desire in 4' increments. Each Modstar section measures 34" h x 4' w. It can also be staked into the ground or sand bagged for stability in higher wind situations. Modstar collapses down flat for easy storage and is UPS shippable.

8' Frame System \$198 (2-4' modular sections)
 Ten or more \$160 ea. (with purchase of graphics)
 8' graphic (1 side) \$144

*Use two graphic panels for double sided applications
